HARIZ

Hariz can be used as a **centerpiece**, **a communication medium or as signage**, and be placed on tables, buffets or reception desks.

Hariz is connected, play around with its colors and effects, wherever your imagination takes you.

The heart of Hariz includes Lithium-ion batteries, providing Hariz with a **large autonomy, a wireless communication** and LED for bringing it to light.

The material of the profile, which is perfectly transparent when Hariz is turned off, lights up when Hariz is switched on.

Hariz **dresses up to suit the theme of your event**!
